

## Special Issue

# Recent Trends in Mobile Computing and Sensing

### Message from the Guest Editor

Mobile computing and sensing technologies have revolutionized how we interact with the physical and digital worlds, enabling real-time data collection, edge intelligence, and ubiquitous connectivity. From wearable health monitors to smart city infrastructure, the fusion of mobile systems with advanced sensors is driving innovations in IoT, AI-driven analytics, and energy-efficient embedded systems. This Special Issue seeks high-quality research on cutting-edge developments in mobile and sensing technologies, emphasizing scalability, security, and real-world applicability.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
