

## Special Issue

# Electrochemical Sensors for Food, Pharmaceutical and Biomedical Analysis

### Message from the Guest Editor

High sensitivity and selectivity, quick response time, cost-effectiveness, and ease of application in situ/online are some advantages of electrochemical sensors, which have experienced great advances in recent decades.

Food, pharmaceutical and biomedical analyses require highly sensitive and selective methods. Electrochemical sensors are a very good alternative to standard methods of analysis performed in clinical and pharmaceutical laboratories. This Special Issue will emphasize new electroanalytical methods based on electrochemical sensors for food, pharmaceutical and biomedical analysis.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
