

## Special Issue

# Hyperspectral Sensors, Algorithms and Task Performance

### Message from the Guest Editors

This Special Issue examines the interaction between hyperspectral sensor hardware and algorithmic and processing advances. Specifically, it aims to answer the following questions: What currently limits the state of the art in spectral sensor hardware and processing? What is the minimum quality that spectral sensors must meet? Can any manner of sensor artifact be overcome with a sufficiently good algorithm and processor? Does hyperspectral sensor design drive algorithm development or vice versa? What is the impact of hyperspectral processing acquisition mode and calibration scheme on algorithm development?
