

## Special Issue

# Machine Learning and Sensors Technology in Agriculture

### Message from the Guest Editors

You are invited to submit a manuscript to this special issue of *Sensors*. This issue will consider cutting-edge research on the development and applications of machine learning on agricultural data obtained by sensors. Recently, we have seen a growing interest in the use of machine learning which offers new opportunities for classification, prediction, and analysis of agricultural and environmental spatial-temporal and other data obtained by in situ and remote sensors. This Special Issue therefore aims to put together original research and survey articles from academia and industry on recent advances, technologies, solutions, applications, and new challenges in the field of using machine learning on agricultural and environmental data obtained by sensors. Dr. Krista Zalik

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
