Special Issue

Intelligent Human-Computer Interaction Systems and Their Evaluation

Message from the Guest Editors

Advances in modern user interfaces (UI) and artificial intelligence (AI) have enabled the development of intelligent user interfaces (IUI) that allow new ways of interacting with devices. Intelligent solutions based on sensor technology, IoT, AI methods, and algorithms can leverage various information about users, for enriching devices with IUIs and natural HCI that enable improved productivity, efficiency, and user experience (UX). Novel AI methods and algorithms which will be able to use data obtained from various sensor technologies for pattern recognition and personalization of UIs and HCI according to the characteristics and capabilities of the user.

This Special Issue is dedicated to exploring current trends and challenges in research, as well as opportunities related to intelligent HCIs from the following perspectives:

- Novel Al solutions for innovative HCl solutions that will improve accessibility, trust, UX, and explainability of interactive intelligent systems.
- How new advances in intelligent HCl and its applications can be applied in various contexts.
- Newly developed and validated theories and models for empirical evaluation of intelligent UX.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
