Energy Efficient Design in Wireless Ad Hoc and Sensor Networks

Message from the Guest Editors

Wireless ad hoc and sensor networks have become increasingly popular due to their versatility and flexibility in various applications. However, the limited energy resources of these networks have become a critical bottleneck for their deployment and sustainability.

Energy-efficient design is essential to ensure the longevity and reliability of these networks, while also reducing their operational and maintenance costs.

Guest Editors

Dr. Rosario Giuseppe Garroppo

Dr. Sergio Herrería Alonso

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
