Edge Intelligence: Challenges and Opportunities

Message from the Guest Editors

Mobile edge computing (MEC) enables us to seamlessly and quickly access many kinds of novel services that appeared in the era of B5G/6G. As suggested by mobile network operators, the MEC and B5G/6G have greatly promoted the use of mobile devices, which then generate an ever-growing datastream in network. It is anticipated that we will witness an up to 10,000-fold growth in wireless data traffic by the year 2030. There mobile devices will request seamless connectivity and access to the demand contents with mobility supported. One of the most attractive solutions is the application of AI that helps to predict the trends of customer preferences based on big data, and then the predicted results can be used to address the challenges caused by such a large number of mobile devices and high amount of data traffic.

Therefore, this Special Issue will focus on AI for MEC modelling, analysis and design. This Special Issue calls for high-quality submissions so that the theoretical and practical frontiers can be moved forward for a deeper understanding from both academic and industrial viewpoints.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
