

Special Issue

Sensor Network Applications for Environmental Monitoring

Message from the Guest Editors

This Special Issue addresses studies whose objective is the monitoring and/or characterization of environments through the measurement of relevant parameters. Thus, the focus is on applications of sensor network technologies to monitor, for example, water resources/availability, water pollution, air quality, forest fires, soil conditions for agriculture, disposal of waste/garbage, state of natural heritage and ecosystems for protection/preservation, etc.

Guest Editors

Dr. Sérgio F. Lopes
Prof. Dr. Luis Gonçalves
Dr. José A. Afonso

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
