

## Special Issue

# Sensor Network Applications for Environmental Monitoring

### Message from the Guest Editors

This Special Issue addresses studies whose objective is the monitoring and/or characterization of environments through the measurement of relevant parameters. Thus, the focus is on applications of sensor network technologies to monitor, for example, water resources/availability, water pollution, air quality, forest fires, soil conditions for agriculture, disposal of waste/garbage, state of natural heritage and ecosystems for protection/preservation, etc.

---

### Guest Editors

Dr. Sérgio F. Lopes

Prof. Dr. Luis Gonçalves

Dr. José A. Afonso

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
