AI-Enabled Biosensor Technologies for Boosting Medical Applications

Message from the Guest Editors

Biosensing technologies find a myriad of applications in many aspects of modern society. Among all these, its quintessential use in medical, biological and biomedical contexts has been actively investigated and exploited during the last decades. The range of available biosensor techniques is wide, from biochemical sensors to reagent, ultrasound, electronic, optic, optoelectronic, or electromagnetic sensors, and show promising potential for unprecedented advancements. The development of novel biosensing technologies for future medical applications is therefore considerably alluring. In this multidisciplinary topical collection, we seek to compile insightful contributions that explore the combinations and possible synergies of these two disciplines—biosensors and AI processing techniques—with appealing future prospects for the biomedical realm. We anticipate novel ideas, innovative devices, and cutting-edge approaches that will expand the current boundaries of scientific knowledge. Prospective researchers are encouraged to submit their original works and comprehensive review articles, contributing to the advancement of this thrilling research field.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
