

Special Issue

Recent Developments in Wireless Network Technology

Message from the Guest Editors

Currently, wireless network technology is evolving very rapidly. The growing capacity to transmit information and inter-network traffic is forcing manufacturers to produce more powerful devices that use new methods of data transmission and classification. This connected smart device is used in Vehicular Ad hoc NETWORKS (VANET) for autonomous driving to intelligently control traffic, smart city power and water, and home automation in smart homes. The addition of Massive Machine-Type Communication (mMTC) as a category of Fifth Generation (5G) mobile communication has increased the popularity of IoTs. With the proliferation of IoTs and mMTC services, every wireless device will be connected to one or more wireless-access networks served by multiple APs or base stations (BSs). This Special Issue will focus on the recent prospective technologies, models, systems and applications in WSNs, IoTs, 5G and advanced networking areas. The aim is to collect the most recent developments in Artificial Intelligence of Things (AIoT) research for Wireless Sensor Networking.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
