Special Issue

Advances in Intelligent Vehicular Networks and Communications

Message from the Guest Editors

Intelligent vehicle networking technology extends to fields such as smart medical care, the industrial Internet of Things and agriculture, promoting collaborative innovation in multiple scenarios. This Special Issue aims to bring together papers that demonstrate innovative research, practical applications and future trends in intelligent vehicular networks and communications. We welcome original submissions that address key challenges, propose new frameworks and demonstrate the potential of artificial intelligence in vehicle communication systems.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
