

## Special Issue

# Emerging and Exponential Technologies in Industry 4.0

### Message from the Guest Editors

This Special Issue aims to explore the latest advancements and applications of progressive technologies within the context of Industry 4.0. Topics of interest include, but are not limited to, artificial intelligence, Internet of Things, Industrial Internet of Things, big data analytics, robotics, additive manufacturing, digital twin, as well as cyber-physical and embedded systems. Contributions focusing on innovative approaches, case studies, theoretical frameworks, and practical implementations that enhance industrial processes, efficiency, and sustainability are encouraged. You may choose our [Joint Special Issue](#) in *Applied Sciences*.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
