

Special Issue

Advances in RFID-Based Indoor Positioning Systems

Message from the Guest Editors

The rapid evolution of radio frequency identification (RFID) technology has significantly transformed indoor positioning systems (IPSS), enabling precise and efficient tracking in diverse environments such as smart buildings, healthcare facilities, warehouses, and industrial automation. However, despite recent advancements, challenges remain in enhancing accuracy, scalability, energy efficiency, and real-time processing. This Special Issue aims to explore cutting-edge research and innovative solutions in RFID-based indoor localization. For more details, please visit [here](#).

Guest Editors

Prof. Dr. Joao da Silva Pereira

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
