

## Special Issue

# Advancements in the Use of Distributed Sensing and Edge/Cloud Diagnostics in Structural Health Monitoring Systems

### Message from the Guest Editors

Structural health monitoring (SHM) based on distributed sensing is increasingly investigated in engineering fields to turn preventive maintenance into predictive lifecycle management. Advances in Industry 5.0 and the Internet of Things, including improvements in communication, miniaturization, and protocols, enable computing close to data sources, reducing latency, especially for big data streaming. This is exacerbated by artificial intelligence (AI) and machine learning evolution, promising but data-demanding. Hence, deploying AI algorithms at the network edge is crucial for real-time data processing and efficient decisions. Edge/cloud computing and optimization in SHM systems are of utmost importance, with strong emphasis on trustworthiness and reliability assessment. It is expected that distributed sensing and edge/cloud analysis related to the field of SHM is described thoroughly and demonstrated in a relevant environment. Numerical investigations may also help to provide additional insights. In any case, it is mandatory to show experimental results with permanently installed sensors from a dedicated laboratory experiment, possibly combined with a demonstration in the field.

### Guest Editors

Dr. Vittorio Memmolo

Department of Industrial Engineering, University of Naples "Federico II",  
Via Claudio 21, 80125 Naples, Italy

Dr. Jochen Moll

Department of Mechanical Engineering, University of Siegen, 57076  
Siegen, Germany

### Deadline for manuscript submissions

31 July 2026

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
