

Special Issue

Human Performance Sensing and Human-Structure Interactions

Message from the Guest Editors

Dear Colleagues: This Special Issue of *Sensors* is soliciting contributions focused on human performance sensing and health monitoring, as well as sensing the interactions/interfaces between humans and artificial structural systems. Examples of specific topics of interest include: (1) wearable Internet-of-Things (IoT) technologies and feedback mechanisms; (2) bio-marker, biochemical, and bio-molecular sensing; (3) understanding and modeling of structural responses induced by humans or animals; (4) monitoring human–structure interfaces that enhance system performance; (5) novel augmented/virtual reality and sensing data-visualization methods; (6) human-centric structural management methodologies; and (7) laboratory and field validation studies on human performance assessment and human–structure interactions. Potential topics include but are not limited to:

- actuators
- behavior
- data visualization
- digital health
- human in the loop
- Internet-of-Things
- prehabilitation
- rehabilitation
- sensors
- structural performance
- wearable sensors

Guest Editors

Prof. Kenneth Loh
Dr. Haeyoung Noh
Dr. Fernando Moreu

Deadline for manuscript submissions

closed (25 November 2024)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
