

## Special Issue

# New Trends in Automated Control Systems for Biomedical Application

### Message from the Guest Editor

I propose to prepare a Special Issue of the journal *Sensors*, dedicated to the study of biocybernetic complexes, which should include a person interacting with technical structures to perform a variety of tasks. Humans are used to endowing the world of things with human qualities. Therefore, the need has come to identify a person as a biocybernetic structure. Topics of interest include (but are not limited to) the following:

- Problems of digitalization of society and people.
- Systems for continuous recording of ECG, heart rate, and identification of the functional state of a person.
- Exoskeletons, simulators, and insulin pumps as biocybernetic structures.
- Modeling the main systems of human life, such as the cardiovascular system, central nervous system, respiratory system, etc.
- Digital identification of a healthy person.
- Digital identification of a person's condition with cardiovascular diseases.
- Digital identification of the state of the pregnant woman and the fetus at all stages of pregnancy.
- Digital identification of a person interacting with technical, industrial, and political structures.

---

### Guest Editor

Dr. Vladimir Kodkin

The Automated Electric Drive Department, Faculty of Power Engineering, South Ural State University, Chelyabinsk 454080, Russia

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
