

## Special Issue

# Antenna Design and Sensors for Internet of Things

### Message from the Guest Editors

The emerging Internet of Things (IoT) paradigm is going to play an important role in modern and future communication systems. Connecting all physical things in IoT will be done by wireless communication networks. The main challenges of communication systems for IoT include the need for reliable connectivity, the great number of frequency bands to support it, energy efficiency and cost. Thus, the antenna system will be a critical part of the smart devices. To make them intelligent, sensors will be added to IoT devices. The main focus of this Special Issue is on the research challenges relating to the design and integration of antennas and sensors for Internet of Things. Potential topics include but are not limited to the following: Antennas for IoT; Smart sensors; RFID; Miniaturized antennas; Millimeter wave antennas; Massive MIMO; Reconfigurable and smart antennas; Wearables antennas and devices; Antenna integration in complex media; Characteristic modes theory for antenna design; Base station; Handset antenna systems; Terminal antennas; Machine to machine communications; Driverless, connected vehicles; Autonomous sensors

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro  
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
