

Special Issue

Emerging Sensor Communication Network- Based AI/ML Driven Intelligent IoT

Message from the Guest Editors

This Special Issue focuses on the results of the research presented in the above-mentioned domains.

Contributions are invited in the field of AI/ML models for IoT devices and deployed networks. Moreover, research on big-data analytics and approaches and decision-making are also invited, along with new practices and concepts with AI/ML automated systems. Authors are invited from both academia and industry to work on the application of AI/ML techniques to computer systems for the submission of their original articles with designing, optimizing, and implementation of protocols, models, and optimization methods. Regards,

Guest Editors

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
