

Special Issue

AI for IoT

Message from the Guest Editors

Connecting billions of devices that exchange data without any central coordination is what makes the Internet of Things (IoT) one of today's most promising technologies. Handling such a wide amount of data is extremely complex and therefore, recently, AI was put to use for a more efficient IoT. This Special Issue on AI for IoT seeks original, previously unpublished papers empirically addressing key issues and challenges related with the design, implementation, deployment, operation, and evaluation of novel approaches based on the use of AI solutions for the Internet of Things.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
