Special Issue

Al-Driven Internet-of-Thing (AloT) for E-health Applications

Message from the Guest Editors

Internet of Things (IoT) is getting its popularity and expected to have a great impact on our daily lives. However, considering the amount of data coming from millions of connected sensors and devices, the ability to handle such big data in a timely and effective manner will decide whether we can fully enjoy the benefits of IoT. The recent advances in artificial intelligence (AI), such as deep learning technologies, have brought opportunities in overcoming the challenges of IoT development. The integration of AI and IoT is expected to become a trend for many applications. When applying AloT to healthcare, this enables accurate diagnosis and virtual monitoring of patients to develop a personalized patient experience. For example, with the assistance of AloT technologies, we can remotely monitor and analyze the vita signs of the patients, alert healthcare professionals timely, to improve clinical outcomes and allow early diagnosis. This Special Issue will cover all the new challenges and opportunities offered by AloT for Ehealth applications Topics include, but are not limited to, the following: AI; E-health; AloT and so on.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
