

Special Issue

Advanced Measures for Imaging System Performance and Image Quality

Message from the Guest Editors

Imaging systems are integral to our everyday experience. The measurement of imaging system performance and the evaluation of the produced image quality are essential in specifying system requirements and in optimizing their outputs for human or machine (vision) consumption. Advances in imaging technologies (for example, sensors and image signal processes), as well as the wide use of deep learning networks for image understanding, require imaging system performance and quality measures that can successfully describe the imaging system variables and outputs with the appropriate accuracy, precision, and range, while they are adaptable to the environments and conditions that the systems operate. This Special Issue addresses research associated with advanced imaging system performance and image quality measures that are suitable to the quantification of contemporary and future imaging systems. Papers discussing mechanistic/physical, statistical, and neural network-based evaluation and quantification methods, or other novel relevant techniques.

Guest Editors

Dr. Alexandra Psarrou
Prof. Dr. Sophie Triantaphillidou
Dr. Alessandro Artusi

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
