

## Special Issue

# Sensing and Measurement for Smart Grids and Future Power Systems

### Message from the Guest Editor

With the rapid development of smart grids and energy information technology, energy networks and information networks undergo deep integration, and the enhancement of emerging information technology is driving changes in the energy utilization mode. As an important supporting technology, intelligent sensing and measurement technology will penetrate into all levels of the energy Internet and lead to the development of smart grids and future power systems, promoting innovation and industrial upgrading. Based on the development prospects of power information technology, this journal is mainly dedicated to researching the basic principles of power smart sensing and measurement technologies and their characteristics, studying the progress made in sensing technologies, application requirements and the industrial layout in future power systems, and focusing on cutting-edge issues to discuss the impact and challenges in artificial intelligence chips, electrical information processing, clean energy utilization and integrated applications.

### Guest Editor

Dr. Bin Li

School of Electrical and Electronic Engineering, North China Electric Power University, Beijing 102206, China

### Deadline for manuscript submissions

closed (15 January 2024)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

---

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
