

Special Issue

Access Control in the Internet of Things

Message from the Guest Editors

The aim of this Special Issue is to gather the latest research results concerning theories, methodologies, techniques, and new solutions for access control in IoT. In particular, this volume addresses the topic of access control in IoT while considering several dimensions: languages and models, requirements and architectural solutions, security and privacy issues, verification and validation techniques as well as application domains and perspectives. Topics of interest within access control in the IoT context include (but are not limited to):

- Data protection and privacy preservation
- Security and privacy requirements, analysis, and specification
- Architectures, protocols, and services in IoT
- Access Control enforcement techniques for IoT
- Access Control frameworks and tools in IoT
- Distributed ledgers and blockchain applications for access control in IoT
- Access Control in Cyber-physical systems and ecosystems
- Access Control in smart environments (city, home, campus, vehicles, etc.)
- Access Control in IoT specific domains
- Perspectives, challenges, opportunities and issues of access control in IoT

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di
Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
