

Special Issue

Advanced Biophotonic Sensors

Message from the Guest Editor

Biophotonics is an interdisciplinary field exploring the interaction between light and biological materials including tissues, cells, and molecules in living organisms. Recent progresses on biophotonics researches have resolved numerous scientific issues which have not been addressed by using conventional technologies in the fields of biomedical, environmental, pharmaceutical, and clinical studies, leading to innovative and state-of-the-art sensing technologies. This Special Issue is dedicated to advanced biophotonic sensors in those fields and open to contributions ranging from spectroscopy, microscopy, nanoscopy, photonic point-of-care testing, photonic therapeutics and diagnostics, photonic lab-on-a-chip, cytometry, and neurophotonics, to novel imaging and sensing technologies. Machine- or deep-learning-based biophotonic sensing technologies are also encouraged.

- Spectroscopy/Microscopy/Nanoscopy
- Photonic point-of-care testing
- Photonic therapeutics and diagnostics
- Photonic lab-on-a-chip
- Cytometry
- Neurophotonics
- Novel imaging and sensing
- Machine- or deep-learning-based biophotonic sensing

Guest Editor

Prof. Dr. Sungkyu Seo

Department of Electronics and Information Engineering, Korea University, Sejong 30019, Korea

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
