

Special Issue

Advanced Photonic Sensors in Fluid Dynamics

Message from the Guest Editors

With advancements in the field of photonics, we are now more capable than ever to conduct measurements of fluidic properties at a very high spatial and temporal resolution in a non-intrusive manner. This has led, in recent years, to the development of novel sensing methods and techniques employed in aerodynamics, microfluidics, and biological flows for the measurement of a range of parameters, such as pressure, temperature, oxygen concentration, and glucose level, etc.

The goal of this Special Issue is to bring together novel photonic-based fluidic measurement technologies developed for the biomedical sector, the aerospace industry (including wind tunnel testing), waste water treatment, air quality monitoring, and aquafarming. Specifically, this Special Issue will cover, but is not limited to, the following areas: Microfluidics;

Biological flows;

Aerodynamics;

Automotive;

Wind tunnel testing;

Pressure and temperature measurement;

Optical oxygen sensors. For more information on the issue, please access the website at:

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
