Special Issue

Advances in 3D Measurement Technology and Sensors

Message from the Guest Editor

At present, 3D measurement technologies such as structured-light illumination, interferometry, stereo vision, time of flight (ToF), X-ray imaging, ultrasonic imaging, and magnetic resonance imaging are playing essential roles in many fields (e.g., industrial manufacturing, remote sensing, biomedicine, optical engineering, and computer vision). There is a rapidly growing interest in employing these technologies for more potential applications. In recent years, the advent of the big data era has brought about the vigorous development of Internet and computer technology. Benefiting from the abundant accessible data, machine learning techniques such as deep learning are offering new opportunities for the development of novel 3D measurement technologies and sensors. This Special Issue invites contributions addressing topics including but not limited to the following:

- Three-dimensional shape and deformation measurement;
- Three-dimensional reconstruction;
- Three-dimensional data processing:
- Three-dimensional sensors and devices;
- Three-dimensional imaging;
- Depth data acquisition and processing;
- Artificial-intelligence-assisted 3D techniques.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
