

# Special Issue

## Sensors for Agri-Food Safety

### Message from the Guest Editor

This Special Issue will collect state-of-the-art agricultural/food sensor (AFS) technologies, used in ensuring safety in the agriculture/food industry. We welcome the submission of experimental and theoretical results, review articles, and short communications under the topic, “Sensors for Agri-Food Safety”, which includes research concerning the ways in which AFSs monitor the quality, safety, and economic value of agriculture/food products. In addition, during the processes of agricultural/food production, sensors monitor production parameters to increase the production yield, as well as minimizing environmental impact by measuring the levels of toxins and the misuse of GMOs and natural resources for sustainable production. Another subtopic is food fraud, including food adulteration and mislabeling, which is an economic threat to both industry and consumers. Finally, human health is a primary concern. Given that two recent pandemics—2009 Swine Flu and COVID-19—originated from a farm and a food market, respectively, AFS can play an enormous role in eliminating potential sources of future pandemics. Any submissions related to these given topics are welcome.

### Guest Editor

Dr. Mustafa Fatih Abasiyanik

Pritzker School of Molecular Engineering, The University of Chicago,  
Edward H. Levi Hall, 5801 South Ellis Avenue, Chicago, IL 60637, USA

### Deadline for manuscript submissions

closed (20 May 2023)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
