

## Special Issue

# Ambient intelligence Simulations and Smart Sensors: Ubiquitous services and social simulations

### Message from the Guest Editors

Ambient intelligence (Aml) is applied to many scenarios, ranging from smart cities to emergency situations, including health care, social learning, and so on. In these scenarios, users consume Aml services with context awareness features, enabling interactions with smart sensors and embedded systems, context recognition, and communications. This Special Issue seeks scientific works that contribute to facilitating the development, interaction, composition, identification, monitoring, and communication with smart sensors, as well as reflecting the participation of users or agents in Aml scenarios, through real deployments or simulations. Authors can submit papers in the areas of ubiquitous and pervasive services, cyber-physical systems, home automation, blockchain-based scenarios, agent-based social simulations, co-simulations, smart sensors, event prediction and awareness scenarios, end-user service development and composition, and in any other related areas.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro  
Department of Electrical and Information Engineering, Politecnico di  
Bari, Via Orabona 4, 70126 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
