Artificial Intelligence for Sensor Data Analysis

Message from the Guest Editors

The increasing amount of real-time data provided by smaller and cheaper sensors has increased the interest of the research community in methods of analyzing large collections of sensor data. This Special Issue welcomes original research works in the area of sensor data analysis and processing using machine learning, data science, and artificial intelligence techniques.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
