

## Special Issue

# Artificial Intelligence and Internet of Things in Autonomous Vehicles - 2nd Edition

### Message from the Guest Editors

We are happy to launch this follow-up Sensors Special Issue titled "Artificial Intelligence and Internet of Things in Autonomous Vehicles II". Thanks to the many valuable submissions to our previous Special Issue (Artificial Intelligence and Internet of Things in Autonomous Vehicles) link here:

[https://www.mdpi.com/journal/sensors/special\\_issues/AlloTAV](https://www.mdpi.com/journal/sensors/special_issues/AlloTAV) We have already presented some recent developments in the field of autonomous vehicles. The continuous progress of automated vehicle driving functions as well as the global deployment of cooperative intelligent transport systems (C-ITS) both motivate the research, innovation, and development of new traffic control strategies and ITS services.

This Special Issue encourages authors from academia and industry to submit new research results about technological innovations and novel ideas for connected automated vehicles (CAVs), with special interest in artificial intelligence and Internet of Things and their safety impacts.
