

Special Issue

Trustless Biometric Sensors and Systems

Message from the Guest Editors

Biometrics and blockchain are two disruptive technologies that promise to facilitate more streamlined and secure authentication and identity management in the digital world. The secure and private verification of biometric templates in the blockchain and/or delegation of feature extraction and matching processes will make it even more difficult to circumvent biometric authentication. On the other hand, biometrics can streamline and secure blockchain identities; enable new governance models, smart devices, and wallets; and propose new use cases where security and usability are fully balanced. The Special Issue will explore the potential of blockchain for trustless biometric systems, examine how the two technologies can benefit from each other, and discuss opportunities and challenges with the goal of advancing understanding of the synergies between the two fields. Topics include, but are not limited to, the following: smart biometric sensors and systems, privacy-preserving biometric methods, decentralised matching methods, delegating computations, the protection of biometric templates and privacy, and smart contracts for the trust management of biometric data.

Guest Editors

Prof. Dr. Kristijan Lenac

Faculty of Engineering, University of Rijeka, 51000 Rijeka, Croatia

Dr. Žiga Emeršič

Faculty of Computer and Information Science, University of Ljubljana, 1000 Ljubljana, Slovenia

Deadline for manuscript submissions

10 February 2026

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
