

Special Issue

Blockchain-Enabled Privacy Preserving for Intelligent Transportation Systems

Message from the Guest Editor

With further developments in Internet of Things (IoT) technology, intelligent transportation systems (ITS) have greatly advanced in effective traffic management. However, risks and challenges regarding safety and privacy have emerged, necessitating the development of disruptive technologies for future ITSs to meet the growing security requirements. As a decentralized and trustworthy solution, blockchain technology has been widely used in various academic and industrial areas. With potential capabilities, the blockchains enable a transparent and traceable way of storing and sharing information, thus enabling secure communication between vehicles. Blockchain-based privacy-preserving solutions and strategies can thus ensure effective ITS implementations. This Special Issue will focus on advanced research regarding the potential applications of blockchains in intelligent transportation systems. Topics include:

- Blockchain-based security, privacy, and trust;
- Blockchain architectures, protocols, and algorithms;
- Vehicle communications;
- Privacy preservation;
- Internet of vehicles;
- Intelligent transport system;
- Vehicular networks.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
