

Special Issue

Biomedical Sensors and Data Processing in Human Monitoring for E-health

Message from the Guest Editors

Biomedical sensor technology advances allow the monitoring of several physiological signals, often in wireless and non-invasive conditions, in order to better monitor and treat diseases and more especially chronic ones. These new devices must have innovative sensors and embedded systems with specific signal processing related to wireless information and cloud decision systems. In this Special Issue, researchers are invited to submit contributions describing new sensors, new adapted signal processing, wireless information transmission and artificial intelligence (AI) approaches. All innovative studies related to innovative E-Health instrumental chain are also welcome (e.g., data recording and standardization, experimental protocols). Potential topics include, but are not limited, to the following:

- Situation-awareness sensors for home monitoring
- Smart sensors (e.g., textiles)
- Sensor fusion algorithms
- Signal processing and AI algorithms
- Applications: elderly home monitoring, disease or post-surgery monitoring, physiological state detection (e.g., sleep, stress), telemedicine

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
