

Special Issue

Building Trustworthy and Dependable Infrastructure in the Internet of Things

Message from the Guest Editors

The advancement of smart devices, such as smart sensors, smart healthcare systems, and wearable devices has great impacts on human life and industry. Millions of smart devices are connected and communicated to deliver a lot of data related to humans, devices, and communications, but they are at risk of various attacks. The security of the Internet of Things (IoT) is the most significant urgent task to build a trustworthy and dependable infrastructure for IoT. This Special Issue aims to present various security solutions using innovative emerging technologies including blockchain, artificial intelligence, machine learning, and software-defined networking. This Special Issue is addressed to all types of security issues in IoT, such as device security, privacy, side-channel attacks, communication vulnerability, identity management, access control, and data security. Topics of interest include but are not limited to:

- AI and ML/DL techniques for securing IoT;
- Cyber threats and incident analysis in IoT;
- Blockchain for IoT security;
- Intrusion and anomaly detection techniques for IoT;
- Secure protocol designs and new theory for IoT;
- Device security and malware for IoT.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
