

## Special Issue

# Computer Vision-Based Human Activity Recognition

### Message from the Guest Editor

This SI targets innovations that support the narrative given above. It also includes new methods and designs for systems based on the Internet of Things; cyber-physical and embedded systems; sensor data acquisition; sensor data fusion; data analytics involving probabilistic and digital twin models to classify, predict, and simulate HAR; data science and AI; and data visualisation and decision support for HAR. Note that accepted papers need to have a viable computer vision-sensing element for HAR.

---

### Guest Editor

Dr. Stefan Poslad

Director, IoT2US Lab, Queen Mary University of London, London, UK

---

### Deadline for manuscript submissions

20 July 2026

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
