

## Special Issue

# Deep Learning Based Face Recognition and Feature Extraction

### Message from the Guest Editors

Human faces play a central role in interpersonal communication and social relationships, which is why their automatic recognition and analysis has attracted the attention of the computer vision community for decades. State-of-the-art facial recognition techniques enable the identification of a person for ID verification as well as to recognize and understand the psychophysical state, which is essential for smooth and high-quality human–computer interaction. Efficient facial recognition, verification, and identification algorithms are essential for developing reliable access control, surveillance, and security systems. In recent years, a number of face recognition methods based on deep learning and various feature extraction techniques have been developed, leading to significant advances in the field. Indeed, face recognition is one of the most active areas in computer vision research, and recent advances in systems based on deep learning have significantly improved their performance compared to solutions using classical machine learning and pattern recognition techniques.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
