Advances in Bio-Inspired Sensing: Materials and Devices

Message from the Guest Editors

In modern society, sensors are ubiquitous. The recent advances in fields like autonomous driving, Internet of Things, or advanced robotics, drive a high demand to develop novel sensor materials and devices. Bio-inspired materials and sensors have broad application prospects which range from disease diagnosis, control and therapy, bioengineering process control, agriculture and food security, battery health monitoring to environmental quality monitoring and beyond. The design of bio-inspired sensors requires a deep understanding of the interplay between morphology, microstructure, and composition of stimulus-responsive materials as well as their sensing functionality. For the translation of such materials into a bio-inspired sensor device, aspects regarding the read out of the material's response as well as signal processing are of fundamental importance. For this Special Issue, we encourage you to contribute original research papers that focus on all aspects related to bio-inspired sensing.

Guest Editors

Prof. Dr. Hermann Kohlstedt

Dr. Claudia Lenk

Dr. Alexander Vahl

Prof. Dr. Sung Kwon Cho

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
