

# Special Issue

## Bioelectronic Sensor

### Message from the Guest Editors

Several three-terminal organic bioelectronic structures have been proposed so far to address the needs for a variety of biosensing applications. The most popular structures utilize organic field-effect transistors operated in an electrolyte, to detect both proteins and genomic analytes. They are endowed with selectivity by immobilizing a layer of bio-recognition elements. These features along with the foreseen low-cost for their production, make them very appealing for point-of-care biomedical applications. Electrolyte-gated organic field-effect transistors (EGOFETs) and organic electrochemical transistors (OECTs) are prominent for detecting biochemical recognition events, as they are easily fabricated and operated. This Special Issue is dedicated to advanced and emerging concepts and technologies of transistor amplified detection for different biochemical reactions. Topics include field-effect transistor (FET)-based transduction of biochemical events, such as ionic and enzymatic, as well as immunometric or genomic interactions. For detailed information, please visit [here](#).

### Guest Editors

Dr. Eleonora Macchia

Physics and Center for Functional Materials Faculty of Science and Engineering - Åbo Akademi University, 20500 Turku, Finland

Prof. Dr. Luisa Torsi

Department of Chemistry, University of Bari, 70125 Bari, Italy

### Deadline for manuscript submissions

closed (30 June 2021)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
