Labeling Biosensors

Message from the Guest Editors

This Special Issue focuses on the development of various labels and enzymes that support biosensing technologies and a labeling sensing system with features such as small size, high sensitivity, and easy operation.

- fluorescent labels
- nanoparticles
- enzymes
- optical biosensors
- nearfield optics
- digital assay

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
