

Special Issue

The Art of Miniaturized Biosensing Systems, from the Laboratory to the Field

Message from the Guest Editor

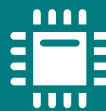

After decades of biosensor development, where are the applications? What is the state of research in laboratories? What are the limits or barriers to overcome? Sensors offers a Special Issue dedicated to these topics that drive us all, that is to say, the ability of laboratory studies to be transferred to industry to meet real needs. The expected articles can cover all aspects of biosensors (affinity, enzyme, cell, data processing, sampling by drones, etc.), but also economic and strategic studies that can help scientific communities to better orient their research or respond to major societal challenges. All applications are also expected (food, health, environment, space, etc.).

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
