

## Special Issue

# Advances in Blockchain Technologies towards Identity Management and Its Applications in ICT and IoT

### Message from the Guest Editors

This Special Issue intends to address broad challenges and open questions, and answer questions related to distributed ledger technologies and their involvement in ICT and/or IOT applications. We are searching for original unpublished high-quality research articles on the latest advances and findings in theoretical or practical aspects of the field that can shed light on the challenges discussed above. We will accept review articles only if they provide readers with a thorough methodology and results that apply to a multitude of professionals in the industry as well as academia. They must also present quality insights and directions for possible future research.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
