Special Issue

Advanced Sensing Systems for Building Inspection, Visualization and Assessment

Message from the Guest Editors

This Special Issue focuses on innovative sensing technologies and intelligent systems for building condition assessment, defect detection, and heritage preservation. We invite contributions on multi-modal sensor integration (visible, thermal, LiDAR, hyperspectral, etc.,), Al-enhanced analysis, digital twin visualization, and automated inspection frameworks that advance building maintenance practices and smart city infrastructure development. Core research areas and topics include, but are not limited to, the following:

- Automated inspection platforms (UAV swarms, robotic systems, mobile mapping system);
- Multi-modal building sensing (Visible/thermal/ LiDAR/ hyperspectral imaging);
- Al-driven defect detection (deep learning for crack, moisture, material degradation detection);
- 3D reconstruction and digital twins for building modeling and envelope assessment;
- Real-time monitoring systems for ageing infrastructure:
- Heritage building preservation through advanced imaging;
- Energy performance assessment via façade thermal analysis;
- Non-destructive testing technologies (groundpenetrating radar, acoustics, vibration sensors).

Guest Editors

Prof. Dr. Yue Fan

Dr. Fei Xue

Dr. San Jiang

Deadline for manuscript submissions

31 August 2026

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
