

## Special Issue

# Camera Identification on Mobile Devices

### Message from the Guest Editors

Given the everyday decreasing cost of digital imaging devices, there is a non-stop larger presence of digital content in people's daily lives, not just as consumers, but also as producers. In fact, we are immersed in a massive explosion of digital media availability, which collaterally imposes the need for fast, reliable and inexpensive data origin identification or authentication. This fact is becoming more relevant considering the daily increasing population belonging digital embedded cameras, such as smartphones, and producing and sharing media on the Internet. However, the existence of a larger community, comprises also an increasing number of situations of improper use. In this sense, researchers have shown a particular interest in the camera identification problem for forensic investigations, i.e., considering its utility as evidence or silent witness in court.

This Special Issue invites researchers to focus on this particular problem in the context of mobile devices defining state-of-the-art solutions for real-world applications, in the wild benchmarks, new applications, or critical surveys.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
