

Special Issue

Recent Advances in CMOS Image Sensor

Message from the Guest Editor

The CMOS image sensor has evolved from an image acquisition device to having sensing capabilities. Continuous innovations have seen advancements and improvements in areas including pixel size, read noise, readout speed, efficiency, time resolution, power consumption, and stacking structure. These enable various kinds of applications, such as high-dynamic-range, time-of-flight, single-photon counting, augmented reality/virtual reality, biomedical imaging, and many others. CMOS image sensors exist in a diverse variety of products in our everyday life, from consumer electronics such as mobile phones and digital cameras to automotive, security, medical, and others. These are expected to continuously grow with advanced performance and new functionalities. This Special Issue aims at highlighting the recent developments in CMOS image sensor technology and applications. For more information, please see: mdpi.com/si/102084

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
