

Special Issue

Selected Papers from the 5th International Conference on Applications of Optics and Photonics (AOP2022)

Message from the Guest Editors

We are pleased to announce this Special Issue to be published in *Sensors* that will contain a selection of papers submitted and accepted at the AOP2022 conference in subjects relevant to the *Sensors* journal. We warmly invite researchers to submit their contributions, both original research articles and review papers, to this Special Issue. Topics include but are not limited to the following:

- Nanophotonics, plasmonics, theoretical optics, and quantum and nonlinear optics;
- Optical communications and sensors;
- Optical fibers and applications;
- Biophotonics and biomedical and medical applications of optics and photonics;
- Ultrafast lasers, ultrafast optics, and power lasers;
- Optical metrology, image processing, and industrial applications;
- Optometry, ophthalmic optics, and color and visual sciences;
- Optoelectronics;
- Microwave photonics;
- Photonics and optical instrumentation for space and astronomy;
- Optics and photonics for smart mobility and smart cities.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
