

Special Issue

Machine Learning in Computer Vision and Image Sensing: Theory and Applications

Message from the Guest Editors

Machine learning models have seen tremendous progress over the past decade, with hugely diverse application domains such as Earth observation, spatial computing, natural hazard and environmental modeling, medical imaging, and many more. Computer vision and image sensing area have benefitted immensely from machine learning applications to solve complex and real-world challenges. Advances in machine learning enable us to better analyse image and sensor data. This has driven enormous research endeavours towards solving practical problems in multiple application domain areas including healthcare, agriculture, defence, remote sensing, Earth observation, autonomous navigation, etc. This Special Issue aims to collate a compendium of top-quality research works addressing the broad challenges in both theoretical and application aspects of advanced machine learning models in computer vision and image sensing areas.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Department of Electrical and Information Engineering, Politecnico di Bari, Via Orabona 4, 70126 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
