Context-Aware Sensing in Critical Infrastructure

Message from the Guest Editors

This Special Issue on Context-Aware Sensing in Critical Infrastructure aims to bring together researchers and practitioners interested in the development of new techniques for context-based monitoring for disaster management. The broad areas include but not limited to:

- Recent advances in context aware sensing
- Context awareness in Industry 4.0
- Context data feature engineering using deep learning
- Autonomous context-aware emergency decisions using AI
- Context identification reliability

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.
