Special Issue

Recent Advances in IoT Multi Sensors

Message from the Guest Editor

Several research dimensions are associated with this topic, including (but not limited to): 1) Advances in sensor technologies, such as LIDAR and hyperspectral imaging, enable IoT multi-sensors to collect more accurate and detailed data. 2) Sensor fusion, which is the process of combining data from multiple sensors to create a more complete picture of the environment being monitored. 3) Machine learning, which takes advantage of the multiple sensor data on IoT devices to interpret the data for the device's mission, 4) Edge computing, where IoT multi-sensors process and analyse data at the edge of the network, closer to the sensors, rather than in the cloud, 5) Integration: IoT multi-sensors are increasingly being integrated with other devices such as smartphones, smart homes, and industrial automation systems. This allows for more efficient data collection and analysis. 6) Cybersecurity in IoT multi-sensor devices is another important area of research in the field. Recent advances in IoT security technologies, such as blockchain-based solutions and hardware-based security measures, are helping to address these concerns.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
