

## Special Issue

# Deep Learning and Artificial Intelligence in Wireless Communications Applications

### Message from the Guest Editors

Ever since Guglielmo Marconi succeeded in transmitting data over a wireless channel, the inherent convenience of wireless communication technology has enabled it to exert an ever-increasing impact on our daily lives. The increasing popularity of wireless communication technology has resulted in the rapid advance of wireless technologies. These new technologies for wireless communication are likely to have diverse service requirements, such as extremely low delay, and complex system models, which makes it harder to properly manage them using conventional approaches. This leads to a new research paradigm, i.e., deep-learning- and artificial-intelligence-based wireless communications, which have gained a lot popularity due to their remarkable performance compared to traditional schemes. These new data-driven approaches have changed the paradigm of research to a learning-based approach where the scheme is designed autonomously observing data. This Special Issue encourages the submission of high-quality, innovative, and original contributions covering topics regarding the application of artificial intelligence and deep learning in wireless communication systems.

### Guest Editors

Dr. Woongsup Lee

Department of Information and Communication Engineering, Institute of Marine Industry, Gyeongsang National University, Tongyeong 53064, Korea

Dr. Byungchang Chung

Defense ICT Convergence Research Section, Electronics and Telecommunications Research Institute (ETRI), Daejeon, Korea

### Deadline for manuscript submissions

closed (25 May 2023)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
